

## Bathroom Urinal Mats

Urinal mats are the answer to slippery, foul-smelling floors beneath urinals.

Restroom stalls are rarely cleaned during their most heavily-used hours, which may allow the floor surrounding the urinal to become wet.

Bathroom urinal mats address this problem directly by providing traction and a dry surface for patrons to comfortably stand on without fear of slipping or having their shoes absorb any liquids.

- Urine can often cause tile floors to erode; these restroom urinal mats have an anti-microbial agent that helps prevent erosion from occurring.
