

Clean Room Sticky Mats

Clean room mats are tacky mats that help trap impurities for locations that require stringent dust and dirt control. Our clean room sticky mats feature a tacky surface which removes dirt and dust from shoe surfaces before they can contaminate a "clean room."

- Each case contains 4 pads of 30 layers for a total of 120 layers per case.
- Once the top film is contaminated, simply pull off and discard.
- Clean room sticky mats offer economical dirt and dust control for low-profile carpet, tile and concrete surfaces.
- These clean room tacky mats are ideal for hospital, laboratory and construction use.
- Tacky polyethelene surface; 1/8" thick.
- NOTE: A frame is only necessary when each 30 sheet pad will not be completely used in one location. Frames are ideal for contractors who only use a few sheets at a given location before moving on to the next job site. The bottom of each pad is tacky, which keeps the mat firmly in place regardless of the type of floor the mat is on.
