

Garage Door Thresholds

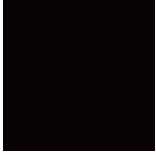

Garage Door Thresholds help prevent dirt, water and insects from enter inside the garage by forming a better barrier between the garage door and the garage floor. These door thresholds are an excellent compliment to traditional garage flooring rolls and tiles.

- The door threshold's slanted edge help prevent water, leaves and dirt from being tracked in by footsteps, tires and being blown in by the wind.
- This garage door threshold comes 10', 16' and 20' in length and can easily be cut to any size without deterioration or degradation.
- These thresholds offer a finished look while protecting the inside of the garage from debris, leaves and water from entering.
- Like our Roll-Out Garage Flooring, this threshold's commercial-grade vinyl design is quite durable and withstands even the most extreme hot, cold and wet environments.

Item No: GRFLMGDT
