## Pyramid Rubber Mats

Pyramid Rubber Mats are designed for use in heavy-use areas such as airports, schools and high-traffic office buildings where traction and durability are top priority.

- Our rubber pyramid mats are made from industrial-grade rubber with a unique, pyramid-shaped surface. Unlike vinyl versions of this product, rubber offers greater traction and slip-resistance, especially when wet.
- The pyramid pattern is approximately 1/8" deep and spaced 1/4" point to point.
- Pyramid mats can be made up to 4' wide and 14' long and are available 3/8" and 1/2" thick.
- Edges are squared for recessed applications or can be beveled for surface use.
- Mats are made with 20% recycled content.
- Available with perforations. Please call for custom lengths, shapes and logo options.
