

Stick and Stand Anti-Microbial Floor Mats

Stick-and-Stand Floor Mats are a smart, cost-effective way to help ensure social distancing among employees and customers alike in order to follow physical distancing guidelines. These adhesive-backed mats stay in place and don't leave a residue and are perfect for keeping a physical distance between people in line. Additionally, these stick and stand mats are anti-microbially treated.

- Stick-and-Stand Mats are a quick and clear way to promote social distancing thanks to the two-foot design and stop-sign shape.
- Ideal for employees and customers waiting in line.
- These stick-and-stand floor mats stay in place thanks to an adhesive backing that holds in place, even with heavy cart traffic and leaves no residue behind.
- Unlike floor decals, Stick-and-Stand mats are anti-microbially treated and also offer a high-traction surface for improved slip resistance.
- Mats can be left in place during daily cleaning (brooms, vacuums, mops and floor scrubbers will not cause damage) and will still hold up for 3-4 months under normal, frequent traffic, commercial use.
