

## Suction Backed Kitchen Mats

Suction Backed Kitchen Mats are commercial-grade kitchen mats that provide traction, comfort and stability thanks to their suction cup backing.

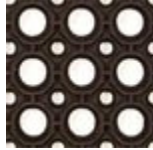

- Dozens of suction cups on the underside of these rubber mats help hold them in place and are especially useful in areas with lots of movement, moisture, greases and oils.
- The textured surface and large drainage holes help prevent slips and falls while allowing debris and liquids to drain through these suction mats.
- Each Suction Backed Kitchen mat is treated with an anti-microbial agent to prevent bacterial growth.
- These rubber drainage mats provide a comfort and stress relief to the neck, back and knees.
- 5/8" thick with tapered edges to prevent trips and falls.
- These kitchen mats are light weight for cleaning and can be hosed off or cleaned in a commercial dishwasher.
